

Discount Approval Policy

Purpose

This policy sets the approval authority required for a sales discount off Harbourline Freight Systems' list pricing, so that larger discounts receive proportionately senior sign-off.

Approval thresholds

An account executive may approve a discount of up to 10% off list price without further sign-off. A discount between 10% and 20% requires sales manager approval. A discount between 20% and 30% requires approval from the VP of Sales. Any discount above 30% requires joint approval from the CFO and the CEO before it can be offered to a customer.

Discount	Approver
Up to 10%	Account executive
10%–20%	Sales manager
20%–30%	VP Sales
Above 30%	CFO and CEO jointly

Requesting approval

Discount requests above an account executive's own authority are logged in the CRM against the opportunity, with the requested discount and its business justification, and routed to the appropriate approver automatically based on the table above.

Multi-year and bundled deals

Where a deal combines multiple products or spans multiple years, the discount percentage is assessed against the blended effective discount across the full deal, not against any single line item, so that a deal cannot be structured to avoid the correct approval tier.

Recording approvals

Every approved discount is recorded against the opportunity in the CRM, including the name of the approver, before the discount can be reflected in a quote sent to the customer.
