

Procurement Approval Policy

Purpose

This policy sets the approval authority required to commit Harbourline Freight Systems to spend with a vendor or supplier, and the additional review required before onboarding a new vendor.

Approval thresholds

Procurement approval is tiered by the total value of the commitment. Spend under \$5,000 can be approved by the requester's manager. Spend from \$5,000 up to \$25,000 requires department head approval. Spend from \$25,000 up to \$100,000 requires CFO approval. Any commitment above \$100,000 requires board approval before a purchase order is raised.

Spend	Approver
Under \$5,000	Manager
\$5,000–\$25,000	Department head
\$25,000–\$100,000	CFO
Above \$100,000	Board

Raising a request

Procurement requests are raised through the Finance Portal, which routes the request to the correct approver automatically based on the estimated total value. Requests that span multiple approval tiers, for example a multi-year contract, are assessed on the full contract value rather than the first year's spend alone.

New vendor onboarding

Any new vendor being onboarded to handle Harbourline customer data must pass a security review before the first purchase order is issued, regardless of the spend tier that vendor's contract falls into. The security review is coordinated between Finance and the engineering security function and must be completed before contract signature.

Existing vendors

Renewals and additional orders with an already-approved vendor follow the same threshold table above, but do not require a repeat security review unless the vendor's access to customer data materially changes.
