

SLA and Service Credits Policy

Purpose

This policy sets Harbourline Freight Systems' contractual uptime commitments to customers, the service credits payable if uptime falls short, and the contractual response commitment for a P1 incident.

Uptime commitments

Standard tier customers are contracted to 99.9% monthly uptime. Enterprise tier customers are contracted to a higher commitment of 99.95% monthly uptime, reflecting the additional infrastructure redundancy included in enterprise agreements. Uptime is measured monthly across each customer's production environment.

Tier	Contracted uptime
Standard	99.9%
Enterprise	99.95%

Service credits

Where actual uptime in a given month falls below the contracted level, customers are entitled to a service credit against that month's fees. Falling below 99.9% uptime entitles the customer to a credit of 10% of monthly fees. Falling below 99.0% entitles the customer to a credit of 25% of monthly fees. Falling below 95% entitles the customer to a credit of 50% of monthly fees. Credits are not cumulative across these bands; the customer receives the single largest credit for which their actual uptime qualifies.

Uptime achieved	Service credit
Below 99.9%	10% of monthly fees
Below 99.0%	25% of monthly fees
Below 95%	50% of monthly fees

Contractual incident response

Harbourline's contractual commitment to customers is to respond to a P1 incident within 30 minutes of it being logged. This is the commitment stated in customer agreements and is separate from Harbourline engineering's own internal acknowledgement target, which is set out in the Incident Response Policy.

Claiming a credit

A customer wishing to claim a service credit must submit the claim within 30 days of the incident giving rise to the shortfall. Claims submitted after this window are not honoured, so customers are encouraged to raise a claim as soon as an uptime shortfall is identified rather than waiting for their monthly statement.
